PREMIER SWINE HEALTH PROFESSIONALS

Agricultural Process Assurance (APA) Division | *Manitoba*

Production & Compliance Specialist

Professional Agrologist (or working toward it) • Farm Audits & Certification • Production Support

Few careers let you split your week between certifying the integrity of Canada's pork supply chain and helping the farmers behind it raise healthier pigs. That's exactly the role we're building at Agricultural Process Assurance (APA), the professional auditing division of Premier Swine Health Professionals (PSHP). We're looking for a Professional Agrologist — or someone with the swine experience and educational background to become a P.Ag. — to join our team in Southeast Manitoba.

About the Role

This position is split between two connected halves of our business.

- **Farm Audits & Validation (about 50%):** Conduct on-farm validations under the Canadian Pork Excellence (CPE) program and Raised Without Antibiotics (RWA) programs, assessing traceability, food safety, and animal care against national standards. Other auditing opportunities in agricultural sectors are possible as well.
- **Production Support (about 50%):** Work alongside our veterinary team on farm production troubleshooting, farmer training, and day-to-day support for our farm clients — putting your agronomy and production knowledge directly to work in the barn.

The two halves reinforce each other: what you see auditing farms sharpens the advice you give as a production support resource, and vice versa.

Our Vision

> *We champion the success of food animal agriculture through loyalty, teamwork, innovation, integrity, and unparalleled service, alongside farmers to feed the world and impacting the lives of people we may never meet.*

That vision guides how we practice: with teamwork and integrity, in service of the farmers and communities who count on us, using knowledge and innovation to help them raise healthier pigs and produce great pork sustainably. Check us out at premiershp.ca and agprocessassurance.com.

Who We're Looking For

We welcome candidates who are already registered with Agrologists Manitoba (P.Ag.), as well as candidates with swine experience and an educational background sufficient to work toward that designation. Either way, we'll support you in obtaining or maintaining certification through MIA, PAACO (Professional Animal Auditor Certification Organization) and Canadian Pork Excellence (CPE) — requirements our own APA team holds today.

You'll work closely with our five staff veterinarians, our production team, and our office and pharmacy staff, in a practice culture built around mentorship and collaboration.

Compensation & Benefits

- Salary in the $65,000–$80,000 range, based on experience and background
- Full continuing education (CE) allowance, including support toward PAACO and CPE certification
- Vehicle provided
- Relocation assistance is available
- Mentorship and support from an experienced veterinary and production team

Location

Manitoba —We welcome applicants from across Canada and living anywhere in Manitoba is required.

How to Apply

If you're a Professional Agrologist looking to put your designation to work in swine production, or you're building toward one and want hands-on mentorship along the way, we'd love to hear from you. Please send your resume and a short cover letter to Dr. Blaine Tully at btully@premiershp.ca, or call 204-801-2552. Applications will be accepted until September 30th, 2026.
